# CSC 326
# Milestone 0

## Setup and Debugging

## What's to Come & What to Expect

- Onboarding Project
  - Learn technologies
  - Learn processes
  - Team / Individual

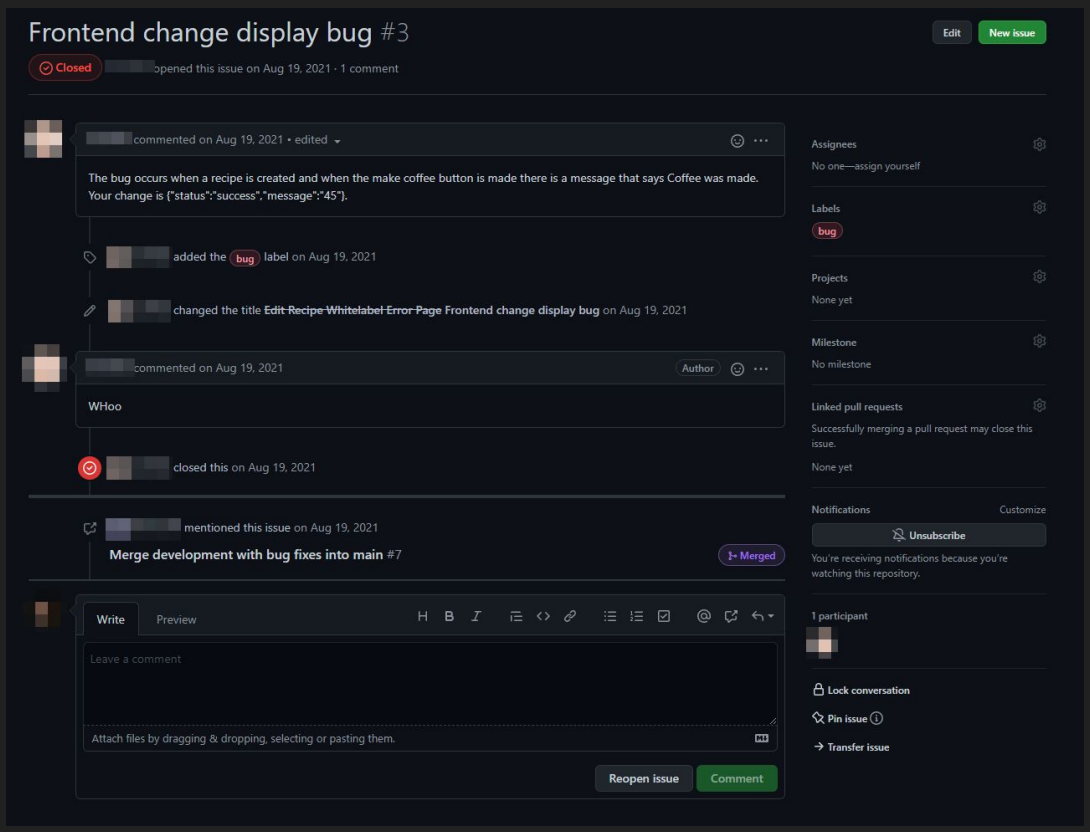

- Weekly "manager" (TA) check-ins
  - Reviewing work
  - Discussing issues
  - Grading deliverables

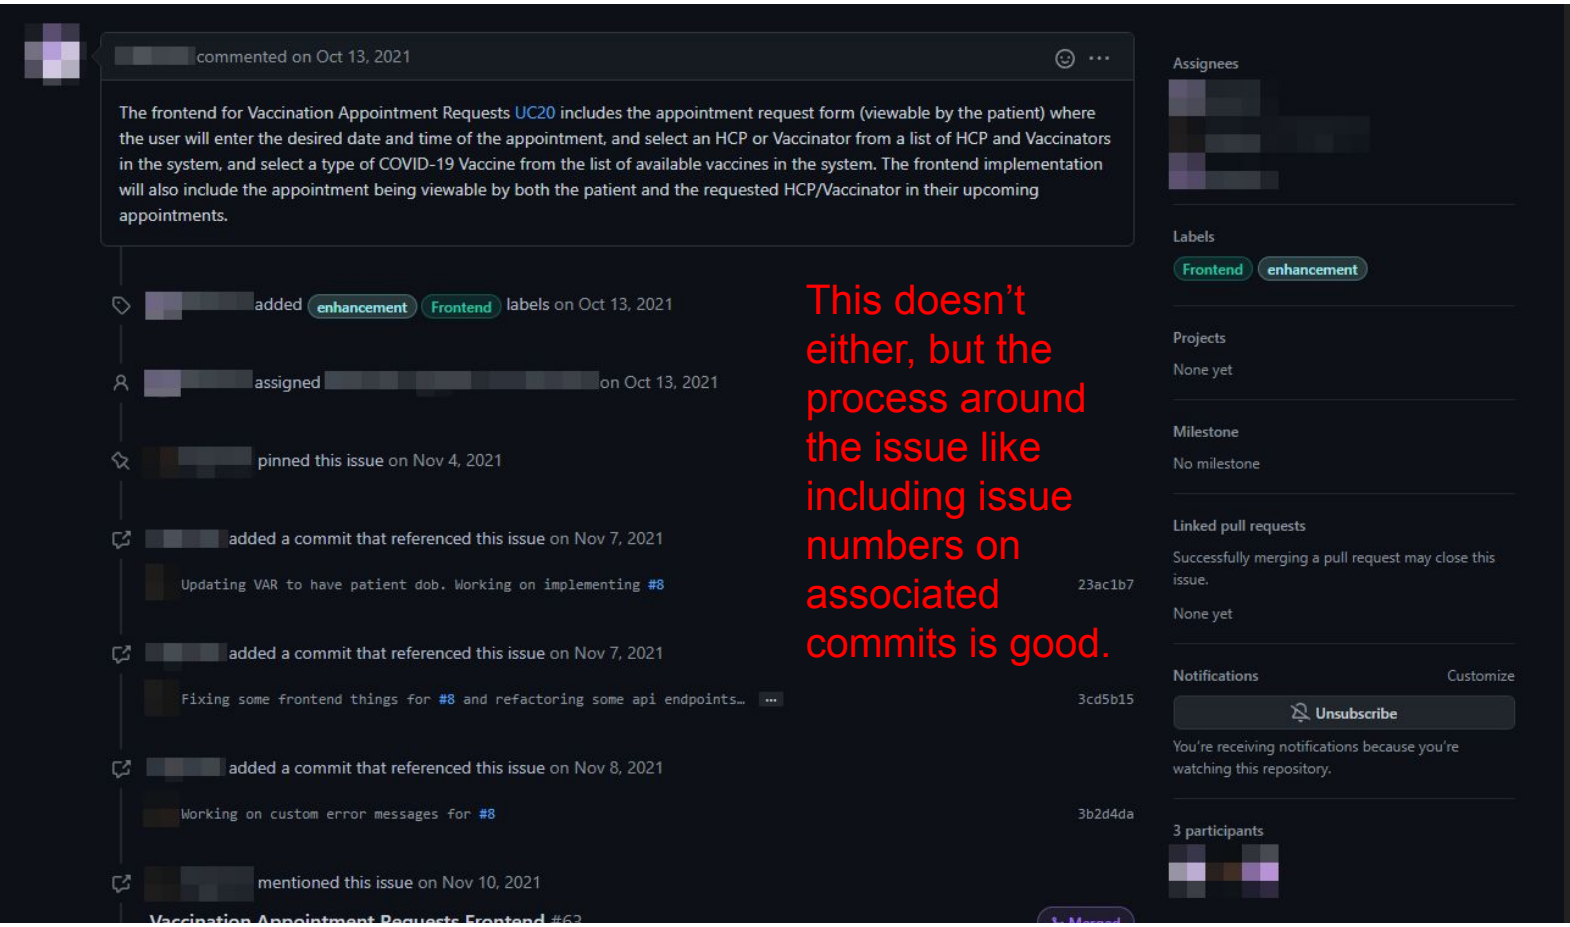

# M0 Grading Check-in Next Week

- Technical Deliverables
  - Completed workshop tasks
  - **Two** bug reports (issues)
    - Good bug reports
    - Using GitHub issues
    - You do NOT need to fix these bugs!
- Technical Process
  - Create branches off development for individual bug fixes
  - Branches merged to development and then merged to main (**not** pushed directly to main)
- Project Management Plan
  - Task List
    - Probably a table
    - Track tasks, owners, deadlines, and status
- Retrospective
  - Technical Deliverables
  - AI Exploration

# Bug Reports

This doesn't meet reproduce, isolate, generalize expectations.

# Course Page Navigation

Quick overview of navigating the course page

Called “CSC 326 Schedule” on moodle

https://courses.csc.ncsu.edu/csc326/

# Attendance Forms

- Individual repo URL
- N/A for Team Number
- Only fill out for yourself
- If your name isn't on the list, let the TAs know. They can update the form to add you.

https://go.ncsu.edu/csc326-attendance

## Suggestion - Bug Report Fields

- ***Title***
- Environment
- ***Steps to reproduce the bug***
- ***Generalization (this can be descriptive)***
- ***Isolation (this can be descriptive of what you removed or considered)***
- ***Expected Result (could be part of Steps to reproduce)***
- ***Actual Result (could be part of Steps to reproduce)***
- Screenshot
- Priority

# Closing: M0 Grading Check-in Next Week

- Technical Deliverables
  - Completed workshop tasks
  - **Two** bug reports (issues)
    - Good bug reports
    - Using GitHub issues
    - You do NOT need to fix these bugs!
- Project Management Plan
  - Task List
    - Probably a table
    - Track tasks, owners, deadlines, and status
- Followed CSC 326 GitHub Process
  - Create branches off development for individual bug fixes
  - Branches merged to development and then merged to main (**not** pushed directly to main)
- Retrospective
  - Technical Deliverables
  - AI Exploration
